2.9 Parking - Parking for Community Needs

Issue CM2.9 Adequate parking for the community's residential and commercial needs are essential.

Goal CM2.9.1 Elimination of on-street parking in all areas possible outside the Fallbrook town center and the creation of additional parking wherever possible.

Policy CM2.9.1.1 Require new single family residential developments to provide off-street parking for all residents and adequate parking accommodations for all visitors and guests.

Policy CM2.9.1.2 Require sufficient on-site parking to accommodate all residents and tenants of multi-family, office professional, and commercial/industrial development projects and adequate parking accommodations for all visitors and guests.

Policy CM2.9.1.3 Special attention must be paid when planning parking for large projects to ensure adequate parking in locations where it is needed. Increase the number of required parking spaces per development to ensure that all parking associated with a project does not spill into local streets.

Policy CM2.9.1.4 Discourage multi-family, office professional, commercial, and industrial development projects from relying on on-street parking to satisfy parking ordinances, with the exception of infill projects within the Fallbrook town center where shared parking facilities are available.

Policy CM2.9.1.5 Encourage existing developments to add additional off-street parking.
